Dashboard Overview

Original Excel dashboard showcase and filtering logic

All-region dashboard: sales 498,030 | cost 380,850 | profit 117,180 | displayed margin 24%. The workbook includes regional slicers, KPI cards and product/region charts.

Performance at a Glance

Unfiltered source workbook totals

498,030 Total sales	**380,850** Total cost	**117,180** Gross profit
23.53% Gross margin	**50** Orders	**9,960.60** Average order value

KPI interpretation

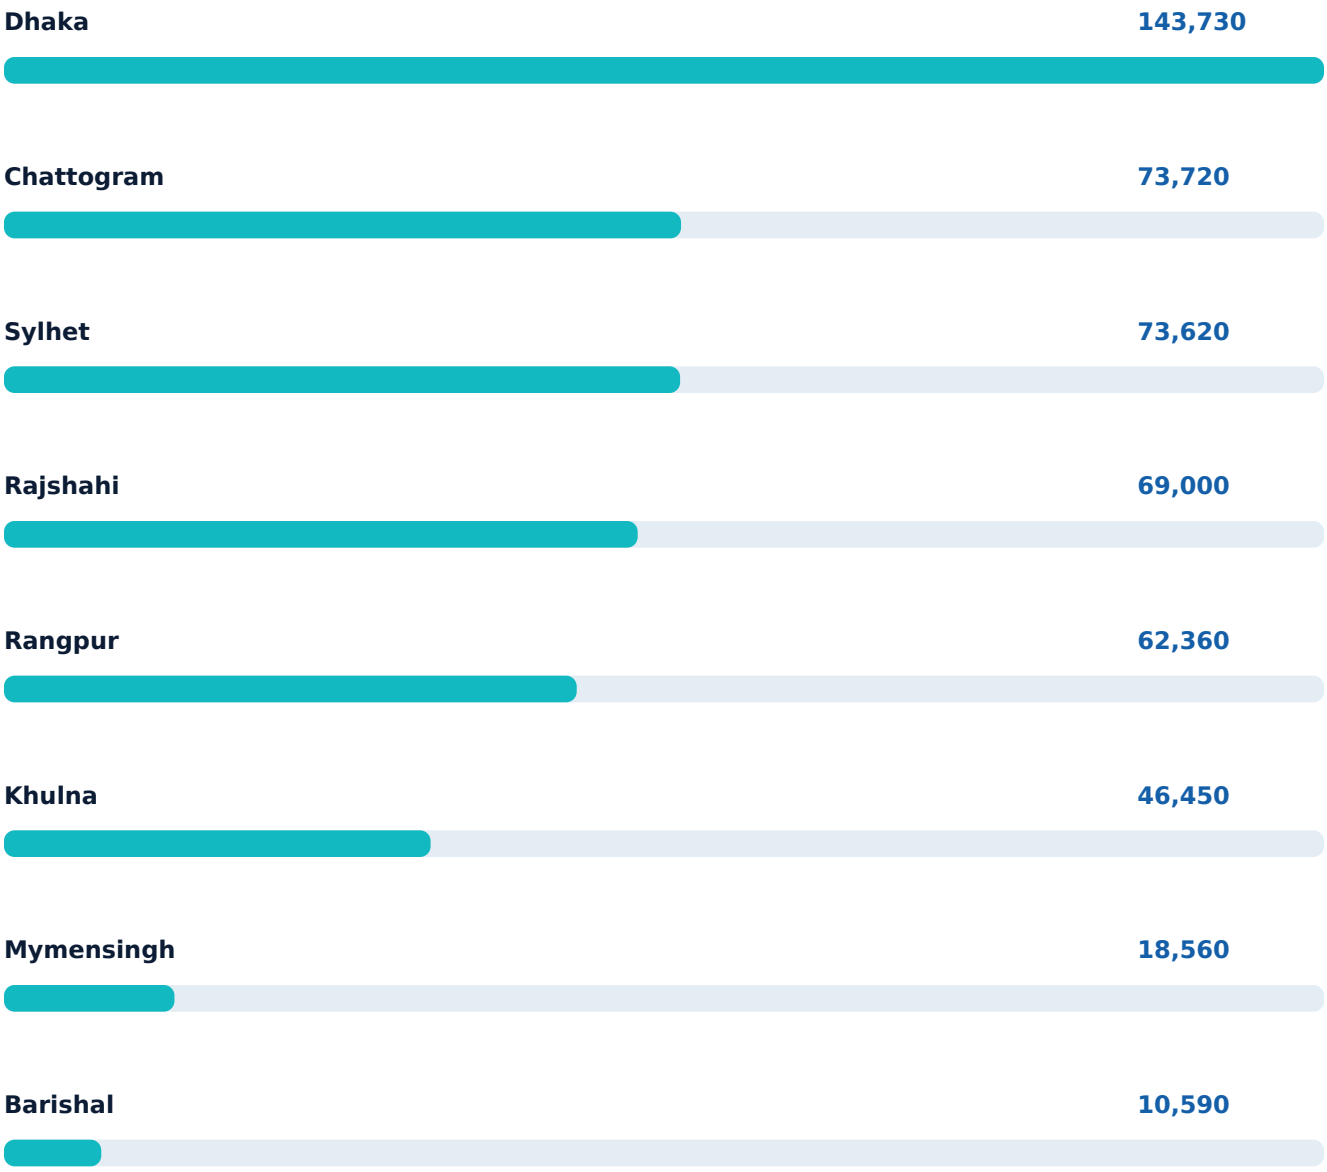

The sales records show positive gross contribution. The reported profit subtracts product unit costs; operating overhead, returns, discounts and taxes were not modeled separately.

Rounding note

The original Excel dashboard displays 24% margin, while the more precise calculation is 23.53%.

Regional Sales Comparison

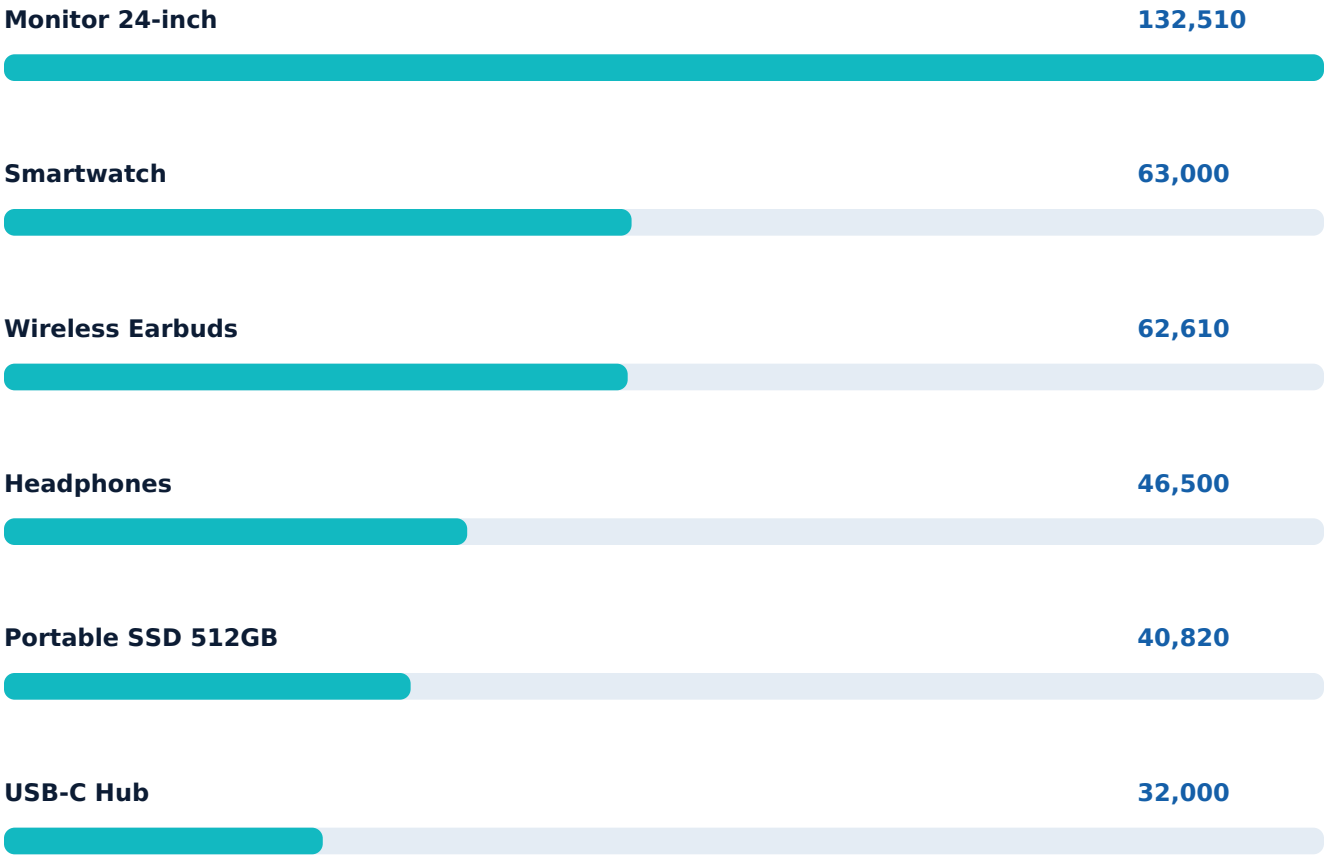

Revenue by region as displayed in the dashboard

Dhaka contributes 28.9% of the displayed total. The original report notes a discrepancy between the dashboard region breakdown and a separate Store ID lookup; reconciliation is recommended.

Product Revenue Analysis

Highest revenue-generating products

Key insight

The 24-inch monitor accounts for 26.6% of total revenue in the underlying sales records.

Business implication

Prioritize stock availability and review contribution margins for top-performing product lines.

Interactive Slicer Analysis

Comparing selected regional filter states

190,180

Dhaka + Khulna sales

44,180

Selected gross profit

10,590

Barishal sales

2,290

Selected gross profit

Dashboard behavior

Regional slicer selections update the headline KPIs and the product/region charts. These are alternative filter states of the same dataset, not additional transactions.

Reported margin

Dhaka + Khulna selection: displayed margin 23%. Barishal selection: displayed margin 22%.

Business Insights and Next Steps

Translating Excel reporting into practical decisions

- Prioritize high-revenue products while reviewing inventory availability and gross margins.
- Validate region attribution by reconciling Pivot Chart labels against the Stores lookup.
- Monitor product-level profitability in addition to total sales volume.
- Keep KPI definitions and calculations consistent across slicer selections.
- Tools demonstrated: Microsoft Excel, data relationships, KPI calculations, Pivot Charts and slicers.
